

Pavlo Verezhak

SUMMARY

Experienced Full Stack Developer with over 10 years of delivering robust, scalable web applications. Proficient in React, Java, TypeScript, Node.js, Python, PHP, and Laravel, with deep expertise in both frontend and backend architecture. Strong background in RESTful API development, third-party service integration, and performance optimization. Thrives in agile environments, skilled in leading complex builds and adapting to evolving project demands.

TECHNICAL SKILLS:

Languages & Frameworks	JavaScript, TypeScript, React, Node.js, Python, PHP, Laravel
Databases	MongoDB, MariaDB, MySQL
Tools & Libraries	Three.js, Tailwind CSS, HTML, CSS, WordPress
Other	RESTful APIs, GraphQL, WCAG accessibility standards, JWT authentication, Google Cloud (Functions, Compute Engine, Storage)

PROFESSIONAL EXPERIENCE

Qualcomm | Full Stack Engineer

Jan 2022 – Apr 2024

- Designed and developed scalable full-stack applications supporting internal tools and performance monitoring systems, using **React**, **Node.js**, **Java**, and **Python**.
- Built and maintained RESTful and GraphQL APIs, enabling efficient data exchange between microservices and front-end dashboards.
- Collaborated with cross-functional teams including hardware engineers, data scientists, and QA to deliver robust tools for chip diagnostics and analytics.
- Led the migration of legacy systems to a modern stack, reducing technical debt and improving performance by 35%.
- Implemented secure authentication and authorization flows with OAuth2 and JWT.
- Integrated **MongoDB**, **PostgreSQL**, and **MySQL** across different modules depending on use-case needs.
- Followed Agile/Scrum methodology, conducted code reviews, and mentored junior developers.

Simform | Front-End Developer

Feb 2019 – Nov 2021

- Designed and developed user-friendly web interfaces for SaaS platforms using React, TypeScript, and Tailwind CSS.
- Collaborated with designers to convert Figma prototypes into pixel-perfect, accessible front-end components.
- Integrated APIs (REST & GraphQL) to power dynamic and real-time application features.
- Applied performance tuning and ensured compliance with WCAG and cross-browser standards.

CloudBeds | Full Stack Developer

May 2016 – Dec 2018

- Led development of an advanced hotel management system, boosting operational efficiency by 25% and improving guest satisfaction by 20%.
 - Built scalable microservices and RESTful APIs to manage large-scale data operations.
 - Designed a secure JWT-based authentication service and deployed solutions using Google Cloud Functions and Compute Engine.
 - Streamlined backend data handling via MySQL and cloud-based storage solutions.
-

Projects

1. Search Attributes for WooCommerce Plugin

<https://wordpress.org/plugins/search-attributes-for-woocommerce/>

I developed this custom WooCommerce plugin to enhance product search functionality. It enables customers to filter and locate products by specific attributes such as color, size, or brand—something not natively supported in WooCommerce. I handled the full lifecycle of the plugin, from architecture and coding to testing and deployment, ensuring it was lightweight, performant, and compatible with a range of WooCommerce setups.

2. Virtual DMA – Dallas Museum of Art

<https://virtual.dma.org/>

For the Dallas Museum of Art's virtual experience, I led front-end development to create a fully immersive digital exhibition platform. The project required implementing smooth scrolling, scroll-based animations, and responsive layouts to replicate the in-person gallery feel online. My work focused on both design fidelity and performance optimization to ensure seamless interaction across all devices, preserving the integrity and beauty of the museum's content.

3. Ruved – Herbal Supplements E-commerce Site

<https://ruved.com/>

I was responsible for the full redesign and development of Ruved's e-commerce platform using WordPress and WooCommerce. The focus was on clean, intuitive UI/UX, mobile responsiveness, and seamless product navigation. I implemented custom themes, optimized checkout flows, and integrated secure payment systems to enhance the shopping experience and increase conversions. The result is a high-performing, visually appealing online store tailored to the wellness market.

EDUCATION

James Madison University | 2010-2014

Bachelor's Degree of Computer Science
